

# The Soft Approach

WITH QUALITY FABRICS AND PRECISE ADJUSTABILITY LETTING IN THE RIGHT AMOUNT OF SUNLIGHT, PIROUETTE WINDOW SHADINGS FROM HUNTER DOUGLAS ARE THE IDEAL FINISHING TOUCHES FOR ANY HOME

**AS WITH PUTTING TOGETHER A GREAT OUTFIT, IT'S** the details that make all the difference when doing up one's home. Adding warmth, colour and texture to interiors, the right window coverings can play an important role in creating a living space that meets the aesthetic and functional demands of homeowners.

Global leading windows coverings company Hunter Douglas has led the industry since 1946, when it developed the first lightweight aluminium blind. For more than 60 years, Hunter Douglas has created a wide range of innovative window coverings of the highest quality – providing solutions for practical needs such as privacy, light control and safety, while beautifully helping homeowners to bring their dream homes to life. One of its latest collections, Pirouette window shadings showcase the brand's renowned aesthetics and functionality.

## Elegant Form

Combining the beauty of fabric with the versatility of a blind, unique design distinguishes Pirouette window shadings. Soft horizontal fabric vanes attached to a single sheer fabric backing take on the appearance of lush, cascading folds when shut, and transform into contoured vanes with the gentle pull of a single cord.

This innovative design makes it a snap for users to adjust Pirouette window shadings, letting in variable levels of soft, filtered light or allowing for an enhanced outside view. Available in a range of sophisticated fabrics and colours, homeowners are sure to find the perfect shade to complement their interior palettes.

## Exceptional Functionality

Hunter Douglas window fashions are designed to be good for you, as well as your interiors: products such as the Pirouette are created to optimise natural light while diffusing it to reduce glare and UV rays that can harm furnishings. The sheer backing of the Pirouette blocks up to 86 per cent of UV rays when the vanes are open and up to 99 per cent when closed.

Another Hunter Douglas innovation, the Invisi-Lift system suspends the Pirouette's soft vanes without any visible or loose cords running through the fabric. This, together with a design that allows for the shading to be rolled up into the headrail, gives homeowners a clearer view of the outside. Anticipating the needs of users, these functions can be easily accessed by a single operating cord, a handheld remote or a wireless wall switch.
