

Piroutte Window Shadings by Hunter Douglas

An exquisitely lit space has been known to do wonders for the world-wearied soul. Evidently in tune with this line of thought, Hunter Douglas has dreamt up a pragmatic yet thoughtful way of making every moment at home an ambient one. Transforming your domestic haven with a touch of a cord, Piroutte window shadings have been designed specifically for customisation and ease. Embodying the best of both worlds - access to optimal natural light as well as the option to lessen its

presence as one desires - its handy Invisi-Lift system facilitates variable lighting; Piroutte's contoured vanes are deftly converted into cascading folds, unveiling snug, textured finishes that serve to soften the light - as well as your disposition.

CONVOY Lavido by Häfele

It is said that you cannot have too much storage space. You can, however, easily forget about those items you store, especially when so many storage systems cleverly hide everything from view, but make that clutter hard to get at quickly. As a solution, Häfele created Lavido, a storage solution from the CONVOY collection. Designed with a sliding rail, this system virtually presents the stored products in clear view, accessible from three sides. CONVOY Lavido has a 130 kg load-bearing capacity and height-adjustable shelves available for 450, 500 and 600mm cabinets. No more the horror of discovering spoiled products at the back of your deep storage.
