

# LIGHT AND SHADE

THE HUNTER DOUGLAS DUETTE® ARCHITELLA® HONEYCOMB SHADES BRING A NEW STANDARD OF SUN SHADING INTO THE HOME.

Singapore's abundance of tropical light is both a boon and a bane – it allows for natural illumination throughout a home, but when too harsh, can cause discomfort from glare and heat. In such a situation, the Duette® Architella® Honeycomb Shades from Hunter Douglas is the perfect solution.

Hunter Douglas is the inventor of the original honeycomb shade with its energy efficient Duette® brand. The Architella® design takes the window system to a whole new level by helping to conserve energy in several ways.

Its honeycomb-within-a-honeycomb structure has three insulating air pockets that reduce heat loss by up to 50 per cent and also helps in solar heat control by reducing solar heat gain into interiors on warm days. Furthermore, it can also harness

the intensity of incoming sunlight and diffuse and disperse it deep into a room, thus reducing one's reliance on artificial lighting during the day. All these features not only result in more comfortable interiors, but also savings in utility bills.

As with many innovative technologies from Hunter Douglas, Duette® Architella® shades can be used with a selection of patented systems that are pet- and child-safe. For instance, the UltraGlide™ retractable cord system gently lowers the shade in a controlled manner to prevent children and animals from getting tangled; the EasyRise™ is a continuous cord loop-and-clutch assembly system whose securely mounted cord tensioner ensures that even the largest shades can be effortlessly raised and lowered. Meanwhile, the remote control-operated PowerRise™ system not only makes it easy to operate shades over hard-to-reach windows, it also provides convenient control with just a push of a button.

Made of 100 per cent spun bonded polyester honeycomb structured fabric that can block up to 99 per cent of harmful ultraviolet rays, the Duette® Architella® Honeycomb Shades are surprisingly easy to maintain. They also comes in a selection of luminous colours and their crisp, consistent pleats maintain a clean and uncluttered look in spaces.
